

MAIN APPLICATIONS

- Extrusion, injection, blow moulding,
- thermoforming of plastics
- Synthetic fibre production and polymerisation
- Packing and packaging
- Chemical and pharmaceutical industry
- Industrial furnaces for heat treatments, metallurgy
- Fusion, sinterization, nitration furnaces
- Furnaces for ceramics and precious metals
- Dryers
- Heating systems with infrared lamps (long-, medium-, short-wave)
- Wood edge banding Machines
- Plastic-blowing Machines
- Welding applications on Packaging Machinery
- Thermoforming Machines
- Furnaces with Super Kanthal™ Silicon carbide heating elements

MAIN FEATURES

- Ultra-compact dimensions from 15A to 120A
- Load voltage 480V, 600V AC
- DIN rail and panel mounting
- IO-Link digital communication
- Current limiting
- Feedback V, I, V^2, I^2, P, Z
- Control output for Slave (2PH, 3PH)
- Zero voltage crossing (ZeroCrossing) or Phase angle control
- On/Off control, optimised/fixed cycle time, HalfSingleCycle, PhaseAngle, soft-start ramps
- Input command, Analogue signal (0..5V, 0..10V, 0..20mA, 4..20mA, potentiometer), PWM or IO-Link logic
- Connectors for push-in control signals; signal LED
- Configuration and diagnostics via smartphone app with NFC technology
- Calibration and alarm reset commands via DI
- 2 outputs : PNP and dry contact, completely configurable
- Cage clamps for power cables
- Advanced load diagnostics
- Internal over voltage protection
- Integrated cooling fan power option

PROFILE

Power control of complex loads needs special precautions. This is for example the case with infrared lamps, or Silicon Carbide heating elements. These kind of electrical loads have not to a constant current absorption during the work phases. This means that at startup when cold, you could have currents up to 15 times higher than the rated current of the load. To avoid that these phenomena cause breakdowns or downtime, the GRM continuously monitors the absorption current and with special algorithms it limits it up to achievement of optimal conditions. The GRM is able to guarantee a stable supply of the energy to the load by compensating for fluctuations of the voltage on the electricity grid, due to variations in the temperature of the loads and the aging of the heating elements. Thanks to the feedback algorithms (feedback in V^2, I^2 and P) is always delivered same amount of energy. The range of ultra-compact power controllers GRM-H meets all these needs, with sizes of current from 15 to 120 Ampere, voltages up to 600Vac.

The range of solid state contactors with heatsink GRM-H meets all these needs, with current ratings from 15 to 120 Ampere, voltages up to 600Vac, in extremely compact dimensions in every single size. The thermal design of all models guarantees the continuous supply of the rated current at an ambient temperature of 40°C / 104°F through high efficiency heat sinks, assisted by fans for the 90A and 120A models. The derating curves show how higher current values can also be obtained for lower temperatures as well as the possibility of mounting various devices stacked on the DIN rail.

CONFIGURATION AND DIAGNOSTICS

For the configuration of the GRM-H series devices, an App is available for smartphones with Android and iOS operating systems, which can be downloaded free of charge from the relative stores. The App interfaces to the device via contactless NFC (Near Field Communication) technology via a small NFC Dongle (which can be ordered as part of the device or as an accessory). It is also possible to read diagnostic data on the operation of the load and the device (energy meters, current peaks or over-temperatures), duplicate or share the configurations of multiple devices through this interface.

The IO-Link interface guarantees efficient communication, capable of powering, configuring, monitoring and controlling the device, via only 3 wires. Complete and simple device configuration is possible with IODD files.

The devices can also be configured using a special cable via PC and the GF_eXpress configuration tool. Alternatively, basic device configuration is made available by means of a button and LED on the front. The current thresholds for partial load break alarms can be adjusted by means of a front key or digital input, so that multiple objects can be configured at the same time with the electrical panel closed.

CONTROL

The GRM-H series can be controlled in different ways based on the options chosen:

- Command signal configurable as 0..5V, 0..10V, 0..20mA, 4..20mA, potentiometer and PWM, for proportional commands (Burstfiring, FixedCycleTime, HalfSingleCycle, PhaseAngle).
- Control via the IO-Link point-to-point communication protocol for comprehensive process diagnostics.

All commands are managed via push-in connectors, for faster and easier connection, even without tools. The device status is always displayed by a multi-colour LED on the front panel, for an immediate view of its operation. In the event of an error in the command signal, a fault power can be programmed which the device will maintain until the signal is restored.

POWER CONNECTIONS

Both the line voltage terminal available on the upper part of the device and the load terminal on the lower part are of the "cage" type, which offers the best and safest seal even for cables of different cross-sections, whether mounted with a cable lug or simply stripped.

DIAGNOSTICS AND ALARMS

It is increasingly vital for operators and maintainers to recognize possible anomalies in the system immediately and solve them quickly in order to ensure the efficiency and profitability of machinery and plants. The GRM-H series offers complete availability of load information.

There are 3 physical outputs, two are PNP type and one voltage-free normally open contact.

The outputs can be configured and associated with different alarm states: partial or total breakages of the load, lack of voltage on the load, faults on the line, over temperature.

The thermal alarm is triggered if heat dissipation exceeds a critical threshold, signalling it with a red led on the front panel, interrupting the power supply and triggering the alarm output.

This function is always present, on all current sizes.

TECHNICAL SPECIFICATIONS

INPUTS	
Analogue command input (Versions with AN input type)	
Function	Proportional power control signal
Maximum Error	1% f.s. \pm 1 scale point at an ambient temperature of 25°C / 77°F
Thermal shift	<100 ppm/° C on f.s.
Sampling time	10 ms
0-10V scale	Input impedance > 500 K Ω
0-5V scales	Input impedance > 500 K Ω
0-20mA or 4-20mA scale	Internal Shunt Resistance: 250 Ω
Potentiometer input	Potentiometer resistance: 1 K Ω at 47 K Ω Potentiometer power supply: + 5V (provided by GRM, max 10mA)
Linear input reading scale	0 ... 100.0 %
Common mode immunity	-60V, +60V
IO-LINK input (Versions with input type I)	
Function	IO-LINK fieldbus communication line
Protocol	IO-LINK Type of transmission: COM2 (38.4 kBaud) IO-Link version: 1.1.2 SIO mode: Yes Auxiliary output: Pin 17/ 18-19 Alarm output Auxiliary input: Pin 14
Line voltage and load current measurement	
Load current measurement function	Measurement range (full-scale f.s.): 0 ... 1.5 * I _{rated_product}
RMS current measurement accuracy	2% f.s. at room temperature of 25°C / 77°F Thermal shift: <200 ppm/° C
Line voltage measurement function	Working voltage range (full-scale f.s.): 60...660Vac
RMS voltage measurement accuracy	2% f.s. at room temperature of 25°C / 77°F Thermal shift: <100 ppm/° C
Current and voltage sampling time	10 ms
Line frequency	50/60 Hz
Configurable I/O	
I/O pin 13 configurable (only with Analog version)	
Function	Configurable as digital output or input
Output Function	Configurable alarm output functions (partial / total load break, line fault, thermal alarm) Potentiometer power supply 5V (max 10mA)
Output type	Output Type Digital output normally off (configurable as normally active). PNP type, output voltage: 5Vdc, I _{out} max = 10mA (not protected against short circuit)
Function Input (default)	Teach In HB partial breakage alarm threshold calibration (default), SCR logic control, Proportional control via PWM, On / Off Software, Reset alarms
Input voltage range	5-30V (max 3 mA)
Voltage reading status "0"	< 2 V
Voltage reading status "1"	> 5 V
Input impedance	17 K Ω
PWM input	Max frequency: (1, ..., 100 Hz) Max resolution 1% (0.1ms)
Configurable pin 14 input (only with IO-Link version)	
Function	Configurable digital input
Function Input	Teach In HB partial breakage alarm threshold calibration, Feedback Calibration, On / Off Software, Reset alarms, Dry out start / restart, disabled (default).
Input voltage range	5-30V (max 3 mA)
Voltage reading status "0"	< 2 V
Voltage reading status "1"	> 5 V
Input impedance	17 K Ω
I/O pin 17 (D17 / DQ)	
Function	Configurable as digital output or input
Function Output (default)	SSR output retransmission (default, for two-phase / three-phase slave control) Configurable alarm (partial / total load break, line fault, thermal alarm)
Output type	Output Type Digital output normally off (configurable as normally active). PNP type, output voltage: U _s (24Vdc)-0.7Vdc, I _{out} max = 30mA (not protected against short circuit)
Function Input	Teach In HB partial breakage alarm threshold calibration, SCR logic command, Software On / Off, Alarm reset
Input voltage range	5-30V (max 3 mA)

Voltage reading status "0"	< 2 V										
Voltage reading status "1"	> 5 V										
Input impedance	17 K Ω										
OUTPUTS											
Alarm output (pin 18 19)											
Function	- Configurable alarm output (default): Partial load break, line fault, thermal alarm										
Type	Voltage free contact (solid state N.O.) max characteristics: 30V-150mA conduction resistance: $\leq 1\Omega$										
COMMUNICATIONS PORTS											
Porta microUSB di servizio											
Functions with TTL serial cable	Only for initial product configuration, via PC. Use a PC connected to the GRM, ONLY via the Gefran adapter cable. The adapter powers the GRM. Cod. F060800 (PC with USB).										
Type	Micro USB type B connector										
Insulation	TTL serial NOT isolated										
Funzione Dongle NFC:	Disponibile per la configurazione, lettura di Informazioni sul prodotto e dati di diagnostica. Utilizzare App scaricabile da PlayStore ed AppleStore e Dongle NFC (vedi tabella accessori)										
POWER (STATIC GROUP)											
CATEGORY OF USE (Tab. 2 EN60947-4-3)	AC 51: resistive or low-inductance loads AC 55b: infrared lamps AC56a transformers, resistive loads with high temperature coefficient										
Trigger modes	OnOff - Zero crossing firing. FCT- Fixed Cycle Time - Zero Crossing with constant cycle time (settable in the range 1...200 sec). BF - Burst Firing with optimised minimum variable cycle time (Zero crossing firing). HSC - Half Single Cycle, corresponds to a Burst Firing which handles half on/off cycles (Zero crossing firing). PA - load management by adjusting the power-on phase angle. It is useful for reducing flicker with short-wave infrared loads. Softstart ramp in Phase Angle configurable with any configured Firing mode Delay triggering : First cycle start-up delay (only for ZC, BF, single phase control mode) Can be set from 0 ° to 90 °. It is useful for inductive loads (primary transformer) to avoid the current peak that could in some cases trigger the ultra-rapid fuses for the protection of SCRs.										
Feedback and Limit functions (optional)	Peak current or RMS limiting algorithms available. Feedback in current (I, I ²), voltage (V, V ²) or power.										
Max. rated voltage	480 V AC						600 V AC				
Working voltage range	60-530Vac						60-660Vac				
Non-repetitive voltage (Surge protection level)	1200 Vp						1400 Vp				
Rated frequency	50/60Hz with auto-determination										
Rated current	GRM Model										
	15	25	25I	30	30I	40	50	60	75	90	120
	15A	25A	25A	30A	30A	40A	50A	60A	75A	90A	120A
Non-repetitive over-current, (t=20 msec)	620A	620A	1600A	620A	1600A	620A	1600A	1600A	1600A	1500A	1500A
I ² t for melting (t = 1... 10msec) A ² s	1800	1800	12800	1800	12800	1800	12800	12800	12800	11250	11250
critical dv/dt with output disabled	1000 V/ μ s										
Rated impulse withstand voltage	4kV										
Rated current in short circuit condition	5kA										
Minimum Load Current:	150 mA										
Voltage drop over rated current:	= < 1,2Vrms										
Presenza di corrente di dispersione:	< 3mA (Maximum value with nominal Voltage and Junction temperature of 125°C / 257°F)										
Dissipated power	Calculation of power dissipated by the solid state relay Pd [W] = 1,4 * I _{rms} I _{rms} = single-phase load current Example: load current = 20Arms, Dissipated thermal power: Pd = 20 * 1.4 = 28W										

INTEGRATED DIAGNOSTICS		
Advanced Diagnostics	<p>- Power failure for: SCR open / Load interrupted / No line voltage - Overheating alarm SCR short circuit (current presence with OFF command).</p> <p>HB (Heat Break) Alarm: - HB alarm load interrupted or partially interrupted, up to 8 loads in parallel. - Automatic calibration of the HB alarm threshold based on the current load level default, alarm threshold equal to 90% of the current read during calibration, recommended value for diagnosing a maximum of 5 equal loads in parallel). So, if the device is left at factory settings, it can manage 2, 3, 4 or 5 loads in parallel without reconfiguration. Note 1: with Digital command turn ON minimum time = 50 ms to detect broken load. Note 2: For the proper operation of the partial load break alarm even in the most critical conditions (8 equal loads in parallel), it is necessary that the total current of the load (not faulty) is at least 30% of the rated current of the GRM (on a GRM from 15A -> 4.5A) Example: a nominal size 15A GRM commands 8 equal resistors in parallel. To have an alarm of failure of only one of the 8 loads in parallel, the single load must have absorption of at least 0.56A, the total load must absorb at least 4.5A (0.56A * 8 loads).</p>	
GENERAL CHARACTERISTICS		
Power supply	10... 30 V DC \pm 10%, absorption 20 mA at 24 V DC (Range from 20 to 27 V DC, I _{max} <150 mA at 24V with Fan active)	
Indications	2 leds: ON (Green LED): Control status SCR STATUS (RGB LED): State of operation	
Protection rating	IP20	
Working temperature	0...80°C (32 ... 176°F) (see derating curves)	
Storage temperature	-20°C - +85°C (-4 ... 185°F) average temperature in a period of 24H not higher than 35°C (95°F) (according to EN 60947-4-3 § 7.1.1)	
Maximum relative humidity	90% non-condensing	
Environmental conditions of use	Indoor use, maximum altitude 2000m	
Installation	DIN EN50022 bar or panel mount by screws	
Installation requirements	Installation category II, pollution degree 2 Maximum air temperature around the device 40°C / 104°F (for Temperature > 40°C / 104°F see derating curves)	
Weight	GRM-H 15, 25A, 25I	388 g / 16.69 Oz
	GRM-H 30A, 30I	388 g / 16.69 Oz
	GRM-H 40, 50A	388 g / 16.69 Oz
	GRM-H 60, 75A	688 g / 24.27 Oz
	GRM-H 90A	796 g / 28.09
	GRM-H 120A	796 g / 28.09

GG FUSES

An electrical protection device known as a GG FUSE must be used to ensure protection against short-circuit of the electrical cable (see EN 60439-1, paragraph 7.5 Short-circuit protection and short-circuit withstand strength" and 7.6 "Switching devices and components installed in ASSEMBLIES", or the equivalent paragraphs of standard EN 61439-1).

ACCESSOIRES

Code	Description
F089025	1 NFC dongle for configuration via App + 1 Gefran keychain lanyard
F089026	5 NFC dongles for configuration via App + 5 Gefran keychain lanyards
F089027	10 NFC dongles for configuration via App
F060800	Cable for programming with PC, USB-TTL 3 V with USB - microUSB connectors, length 1,8 m

FANS (for 90A/120A models only)

Model	Code	Type	Supply
90A FAN60	363484	230 Vac 60mm x 60mm x 30mm for 90A models	Separate power supply
120A FAN60	363011	230Vac 80mm x 80mm x 38 mm for 120A models	Separate power supply
90A FAN61	363485	115Vac 60mm x 60mm x 30 mm for 90A models	Separate power supply
120A FAN61	363003	115Vac 80mm x 80mm x 38 mm for 120A models	Separate power supply
FAN62	363037	24 Vdc 60mm x 60mm x 25mm	Separate power supply
FAN63	363037	24 Vdc 60mm x 60mm x 25mm	Internally powered by GRM-H

PERIODIC CLEANING

Every 6-12 months (depending on dust in the place where it is installed), blow a jet of compressed air downward through the cooling heatsink (on the opposite side of the fan).

In this way both the heat sink and the cooling fan are cleaned.

IN THE EVENT OF OVERTEMPERATURE ALARM

If periodic cleaning does not eliminate the problem, perform the following operations:

1. Disconnect the fan cables from the terminal block (if present) or disconnect the fan connector from the GRM-H (FAN63).
2. Unscrew the screws securing the fan to the support brackets
3. Check the condition of the fan, clean it or replace it
4. Reassemble the fan

* The sizing is valid for a 230Vac phase-neutral line with an assumed short-circuit current of 2,5KA

** The sizing is valid for a 400Vac phase-to-phase line with an assumed short-circuit current of 5KA

*** Between MCB and Load plus return path which goes back to the lines/neutral

The use of MCBs with a **nominal size smaller** than the smallest ones associated with a specific GRM in the table, is allowed without restrictions on the length and section of the cables.

For example, a 25I size GRM can be coupled to a 5SY4116-5 (16) MCB with any cable length or section.

Example, for a GRM-H-50- ..., with line voltage of 230Vac, controlled load of 45 A nominal, with a section of 6mm² of cable, an MCB 5SY4150-5 (50 A) the minimum length of the cables is 7m (cable length is intended between MCB and load, including return).

EMC STANDARDS

EMC emissions

AC semiconductor motor controllers and conductors for non-motor loads	EN 60947-4-3	Class A Group 2
Emission enclosure CI compliant in firing mode single cycle and phase angle if external filter fitted	EN 60947-4-3 CISPR-11 EN 55011	

EMC Immunity

Generic standards, immunity standard for industrial environments	EN 60947-4-3	
ESD immunity	EN 61000-4-2	4 kV contact discharge 8 kV air discharge
RF interference immunity	EN 61000-4-3 /A1	10 V/m amplitude modulated 80 MHz-1 GHz 10 V/m amplitude modulated 1.4 GHz-2 GHz
Conducted disturbance immunity	EN 61000-4-6	10 V/m amplitude modulated 0.15 MHz-80 MHz
Burst immunity	EN 61000-4-4	2 kV power line 2 kV I/O signal line
Surge immunity	EN 61000-4-4/5	Power line-line 1 kV Power line-earth 2 kV Signal line-earth 2 kV Signal line-line 1 kV
Magnetic fields immunity	Test are not required. Immunity is demonstrated by the successfully completion of the operating capability test	
Voltage dips, short interruptions and voltage immunity tests	EN 61000-4-11	100%U, 70%U, 40%U

LVD safety

Safety requirements for electrical equipment for measurement, control and laboratory use	EN 61010-1
--	------------

CAUTION

This product has been designed for class A equipment. Its use in a domestic environment may cause radio interference, in which case the user may be required to use additional attenuation methods.

EMC filters are required in PA operating mode (Phase Angle, i.e., SCR triggering with a modulated phase angle). The filter model and current size depend on the configuration and the load used. It is important that the power filter is connected as close as possible to the GRM-H. A filter connected between the power supply line and the GRM-H or an LC unit connected between the GRM-H output and the load may be used.

ORDER CODE

GRM-H - A - B - C - D - E - F - G - H - I

Rated current	
15Aac	15
25Aac	25
25Aac I2t++	25I
30Aac	30
30Aac I2t++	30I
40Aac	40
50Aac	50
60Aac	60
75Aac	75
90Aac (Fan needed)	90
120Aac (Fan needed)	120

Rated voltage	
480Vac (60Vac...530Vac)	48
600Vac (60Vac...660vac)	60

Control type	
Analogue (0..10V,4..20mA, PWM, Logic OnOff)	AN
IO-Link	I

Control Options	
Open Loop	OL
Advanced Control (Current limit/ DryOut)	AC
AC + Feedback (V,I,V ² ,I ² ,P,Z)	FB

0	
---	--

NFC Dongle accessory	
0	Absent
1	NFC Dongle included in the packaging

0	
---	--

0	
---	--

Fan	
	for nominal current from 15A to 75A
0	No needed
	for 90/120A nominal current models
FAN60	230V AC 60x60x30mm for 90A models 230V AC 80x80x38mm for 120A models
FAN61	115V AC 60x60x30mm for 90A models 115V AC 80x80x38mm for 120A models
FAN62	24Vdc 60x60x25mm
FAN63	24V DC 60x60x25mm integrated power supply

NOTE:

Advanced Diagnostic always included: Thermal protection, Thermal Alarm, Total and Partial heater break, No-line, Current reading.

CE Conformity Declaration is available on web site www.gefran.com

	This device conforms to European Union Directive 2014/30/EU and 2014/35/EU as amended with reference to generic standards: EN 61000-6-2 (immunity in industrial environment) EN 61000-6-4 (emission in industrial environment) - EN 61010-1 (safety regulations).
	UL certification Pending
